JMEACS Journal of Mechanical Engineering, Automation and Control Systems

Aims and Scope

JMEACS publishes a wide range of original research and review articles. The journal Editorial Board welcomes manuscripts in both fundamental and applied research areas, and encourages submissions which contribute novel and innovative insights to the field of mechanical engineering. All submitted articles considered suitable for JMEACS are subjected to rigorous peer review to ensure the highest levels of quality. Original papers which provide an important contribution to the development of mechanical engineering and report on significant developments in the field are encouraged. The review process is carried out as quickly as possible to minimize any delays in the online publication of articles. JMEACS aims to advance the understanding of mechanical engineering by providing a platform for the publication of unique contributions in the field of mechanical engineering across a variety of topics, including.

The list of principal topics:

- Mechanical engineering
- Materials science
- Mechatronics
- Rotor dynamics
- Applied mechanics
- Controls and dynamics
- Machine design
- Design theory and methodology
- Dynamic traffic signal control
- Transportation and logistics
- Railway engineering
- Bridge engineering
- Tunnel engineering
- Urban rail construction
- Engineering machinery
- Industrial robotics
- Intelligent control systems
- Automation, CNC machines and robotics
- Mechanics of materials
- Dynamics of machines, vehicles and flying structures
- Mechanisms, mechanical transmissions and machines
- Manufacturing engineering
- Intelligent transportation systems and traffic control
- Haptics and human-machine-interfaces
- Robotics, mechatronics and micro-machines
- Intelligent systems
- Computational mechanics
- Electronics, information and control systems
- Intelligent control systems
- Mechatronics and robotics
- Robotics and robot applications
- Robotic and control systems
- Kinematics, dynamics, and control of mechanical systems

All published papers are peer reviewed and crosschecked by plagiarism detection tools.
