VP Vibroengineering PROCEEDIA

Vibroengineering PROCEEDIA Volume 12 contains papers presented at the 26-th International Conference on VIBROENGINEERING held in St. Petersburg, Russia, 29-30 June, 2017. The main theme of this Conference is “Nonlinear dynamics and chaos in engineering applications”.

Aims and Scope

Original papers containing developments in vibroengineering of dynamical systems (macro-, micro-, nano- mechanical, mechatronic, biomechanics and etc. systems).

The following subjects are principal topics: vibration and wave processes; vibration and wave technologies; nonlinear vibrations; vibroshock systems; generation of vibrations and waves; vibrostabilization; transformation of motion by vibrations and waves; dynamics of intelligent mechanical systems; vibration control, identification, diagnostics and monitoring.

All published papers are peer reviewed and crosschecked by plagiarism detection tools.
